

# AirSeal® New Product XXHD

## AirSeal HD Spezial

This Product is a reinforced Version of AirSeal HD

- **Application Area**

Everywhere when the Sealing properties of AirSeal HD are on its end, AirSeal **HD Spezial** should be chosen. The product seals also small cuts and seals stitches up to 12,7 mm and can supersede liquid fill over a wide range of applications

- **Properties**

In principal AirSeal HD Spezial is based on the same chemical basics but the active ingredients are stronger

All other features, like temperature resistant, are identical, except the viscosity is a bit higher.

We have chosen Olive as the new product color in order to avoid mistaking with red AirSeal HD

The Pump 405 can be used to fill AirSeal into pressurized Tires

- **Price and Item Number**
